

Example – AI-Supported Job Interview Practice

TARGET GROUP

- Adult migrant or refugee, **A2 Portuguese level**
- Basic digital skills, seeking employment

LEARNING OBJECTIVE

Practise simple job interview questions and answers in Portuguese with AI support.

MAIN CHALLENGES

- Limited vocabulary & low speaking confidence
- Difficulty understanding common interview questions

AI TOOL & DIGITAL RESOURCES

- **AI:** ChatGPT or Gemini – generates simple, A2-level interview questions
- **Tools:** Smartphone, translation tool, text-to-speech, voice recording

PERSONALISATION & ACCESSIBILITY

- AI adjusts vocabulary, difficulty, and feedback by language level and job sector
- Audio support, translation, and short instructions
- Oral or written answer options

EXPECTED OUTCOME

- Learner answers **3–5 common interview questions** with confidence
- Understands key employment vocabulary

Co-funded by
the European Union

Activity Steps

A structured, AI-supported sequence designed for A2-level learners to build real interview confidence.

1. Choose a Job Sector

Select the relevant industry or role to personalise the practice session.

2. AI Generates Questions

ChatGPT or Gemini creates 5 simple, A2-level interview questions for the chosen sector.

3. Learner Responds

Answer orally or in writing, using translation tools or text-to-speech as needed.

4. AI Provides Feedback

Simple, encouraging feedback on language use, structure, and clarity.

5. Improve Vocabulary

Repeat answers using corrected and enhanced vocabulary suggested by the AI.

6. Save to Personal Learning Space

Store key words and phrases in the learner's PLE for ongoing review and practice.

 **Tip for Trainers:** Encourage learners to revisit their PLE entries before real interviews – repetition builds both vocabulary and confidence.
